

PRESS RELEASE

9th October, 2009

ALPINE's annual report wins 3rd place at Austrian Annual Report Awards

Third place also goes to ALPINE in the sub-category 'media quality'

For the 10th time, prizes for annual reports were awarded by the business magazine "trend" at its "Austrian Annual Report Awards (AAA)". ALPINE's annual report won third place in the overall ranking for unlisted companies and also placed third in the sub-category 'media quality.'

A 14-member jury consisting of professionals and academics rated the overall impression as well as the sub-category "media quality," evaluating design, production, photography and the concept. The fact that ALPINE's annual report also won third place in this sub-category is impressive proof of the high quality of the new design, the outstanding project photography and the well-organized concept.

*The **ALPINE** Group, a member of the FCC Group, is a global player. With a construction output of EUR 3.5 billion in 2008 and a staff of roughly 15,530, ALPINE is the second biggest construction group in Austria. For more information visit <http://www.alpine.at>*
