

PRESS RELEASE

ALPINE to build European Championship stadiums in Poland

Joint venture with ALPINE lands contract to build the EURO 2012 stadiums in Danzig with 44,000 seats (and 47,000 seats in Posen). Impressive proof of ALPINE's competence in stadium construction.

Poland will host the European Football Championship together with Ukraine in 2012. The contract to build two of the required stadiums in Poland were awarded to the joint venture comprised of Hydrobudowa Polska. S.A. and ALPINE Bau GmbH, ALPINE Bau Deutschland AG and ALPINE Construction Polska. "Winning this contract is impressive proof of ALPINE's competence in stadium construction," Dr. Peter Preindl, managing director of ALPINE Bau GmbH, proudly announces the decision in Poland in favor of the joint venture. Both stadiums will meet the UEFA requirements and will be completed in time for the European Championships.

Baltic Arena, Danzig (Gdansk)

The city of Danzig's representatives will sign the official order for the construction of the "Baltic Arena" European Championship stadium in Danzig today, April 10, 2009. The joint venture with Hydrobudowa Polska. S.A. and the ALPINE Bau Group submitted the lowest bid and won in the last round against seven competitors. The net contract value is about 95.5 million euros, the construction period 20 months.

The project

The stadium will be built on a 39 hectare piece of land in close proximity to the city center. It will have 44,000 seats and 6,500 parking spaces. The 15,891m² structure was designed by the architects RKW Rhode Kellermann Wawrowsky Architektur + Städtebau and follows Danzig's traditional ship design. The sophisticated girder design and module that gradually becomes more transparent as the stadium rises will give the Arena a "light" and "translucent" appearance.

Posen Stadium

The existing stadium in Posen will be converted and enlarged. Two stands and the entire roof will be newly built. The joint venture between Hydrobudowa Polska. S.A. and ALPINE Bau GmbH, ALPINE Bau Deutschland AG and ALPINE Construction Polska also succeeded in landing this contract.

The stadium, seating 47,000 upon completion, was designed by Sportfive and the architect Wojciech Ryżyński. The contract value is about 89 million euros,

the construction period 17 months. A total of 1,600 parking spaces will be available to visitors.

Competence in stadium construction

ALPINE has extensive experience in executing large-scale stadium projects, gaining highest competence on an international scale in the construction of sports facilities. Following the construction of the Allianz Arena in Munich, ALPINE recently completed the Dubai Cricket Stadium in the world's biggest sports center.

ALPINE is responsible for the construction of the Wörthersee Stadium, the Tivoli Stadium and the enlargement of the Salzburg stadium in Wals-Siezenheim for the EURO 2008.
